

Use Case Document

Bus Transit System

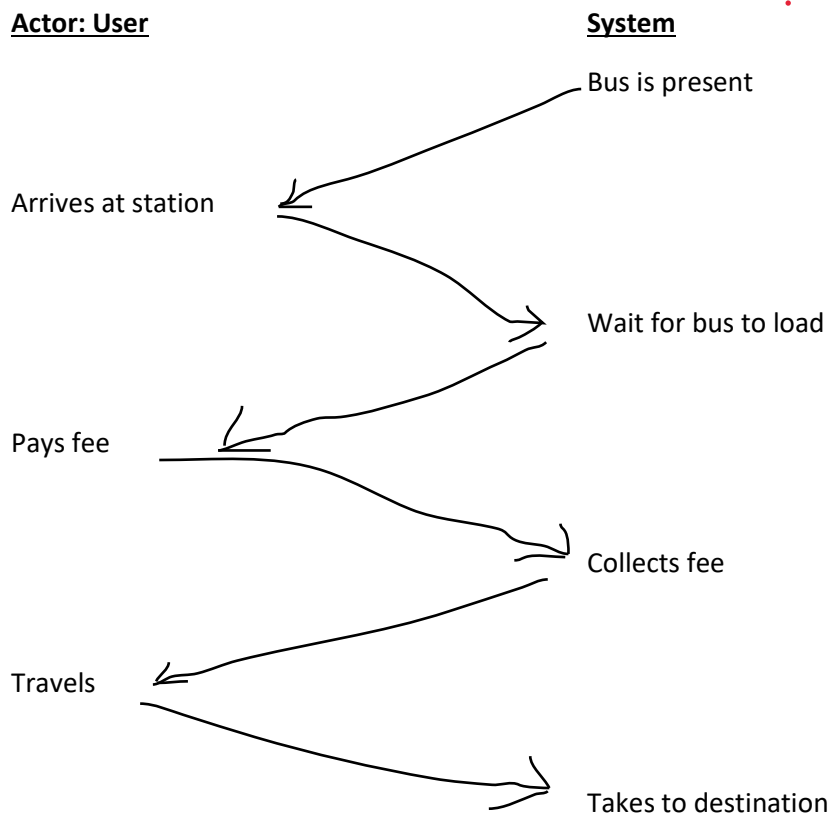

Narrative: it is describing the user intent for the bus ride in a free form text; it tells the story of the user's actions during the use case.

Scenario: it is describing the sequence of events and the list of steps to accomplish a bus ride;

It is a simple step by step statement in logical sequence such as in a Bus Transit System:

- A. Arrives at the station.
- B. Board Bus
- C. Pay fee
- D. Travels

Conversation: it is describing the use case behavior in a dialogue form between the user and the system such as:

Actor/Role Name	Role Description and Objective
Passenger	<p>The Passenger will arrive at the station on time, so they could get to destination on time/schedule.</p> <p>They will board the bus.</p> <p>They will pay their bus fee.</p> <p>They will travel to desired destination.</p>
Driver	<p>The Driver will wait for the bus to be boarded.</p> <p>They will collect the bus fee</p> <p>They will take passengers to their desired destination.</p> <p>They will take Bus to mechanic for service.</p>
Mechanic	<p>Will wait for driver to arrive for service on the bus.</p> <p>Will service the bus.</p> <p>The Mechanic will return the bus to the driver.</p>
